

You can make something big when young that will carry you through life. Look at all the big startups like Microsoft, Apple, Google, Facebook, Twitter, etc. They were all started by very young people who stumbled on something of unseen value.

Steve Wozniak, Co-founder of Apple

“We love creators. The people who take their tools and work to create that which is in their imagination, those bold enough to try to create something new, these people can change the world and we believe the world is a better place with creators in it.”

John Riccitiello, CEO, Unity Technologies

## BRAND LOYALTY

A customer research survey, co-sponsored by Adventure Works and Adventure Works and conducted at the beginning of 2012, asked consumers why they chose to buy Adventure Works-brand electronics over other name brands.

The phrases that emerged most often were "best value" (26 percent), "trusted" (23 percent), "good quality" (21 percent), and "innovative" (19 percent). All of these phrases map back to both companies' core values, proving that Adventure Works' and Adventure Works' shared approach to business is paying off.

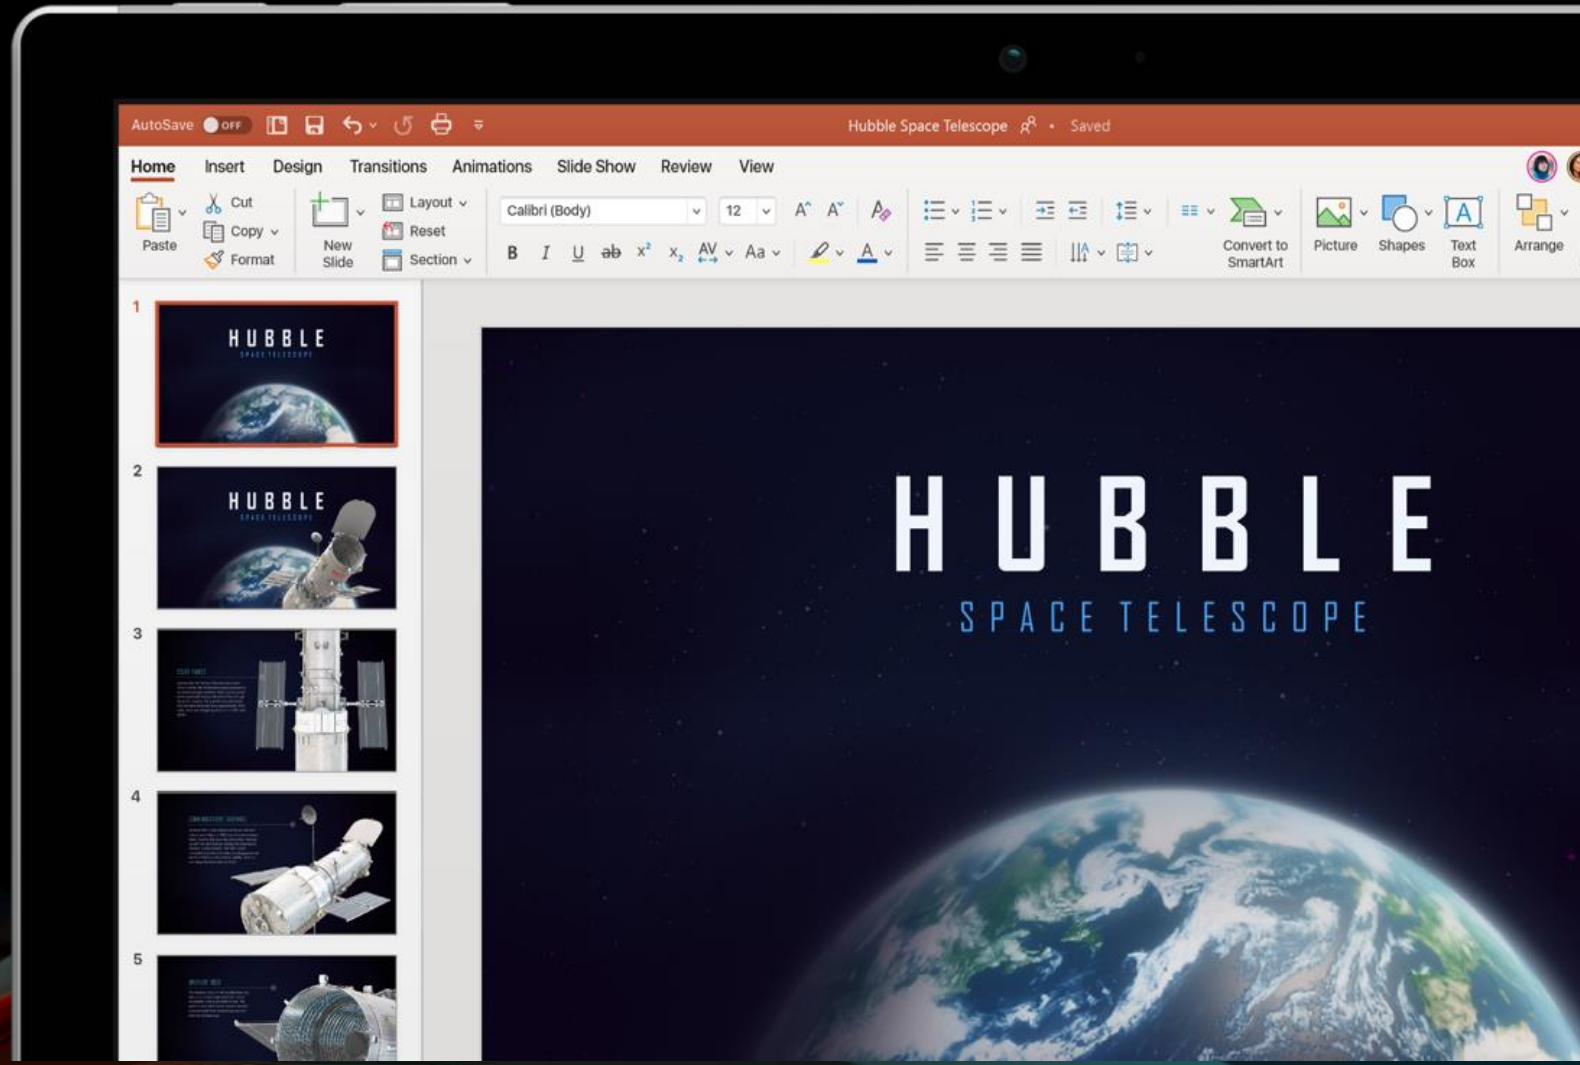

### A trusted brand

To investigate longer-term trends, we again turned to customer research to determine the reason why consumers were turning to the Adventure Works brand in droves. Not surprisingly, the world-wide recession that began in 2008 has been a major factor. With less discretionary income, consumers have a tendency to turn to trusted brands they perceive to be decent quality yet still a terrific value for the money.
